PROFESSIONAL SUMMARY

Aspiring Software Engineer specializing in Data Engineering for AI with strong foundations in full-stack development, Data Structures and Algorithms, DBMS, and scalable backend systems. Skilled in Python, Java, SQL, and modern web technologies. Passionate about problem solving, software development, and data-driven applications.

EDUCATION

B.Tech in Computer Science Engineering (Data Engineering for AI) 2023 – 2027
KL University CGPA: 8.7/10

Intermediate (State Board) 2021 – 2023
NRI Junior College
Marks: 612/1000 Percentage: 61.2%

SSC - 10th Class (State Board) 2020 – 2021
Bhashyam High School
Marks: 582/600 Percentage: 97%

TECHNICAL SKILLS

Programming Languages	C,c++, Java, Python, JavaScript
Frontend Technologies	HTML, CSS, React.js
Backend Technologies	Node.js, Express.js, Spring Boot
Databases	MySQL, MongoDB,SQL, DBMS
Tools	Git, GitHub, VS Code ,ERP
Core Concepts	DSA, OOP, Networking, REST APIs, Data Processing, Big Data
OS	Operating Systems, Linux

PROJECTS

Smart Manufacturing Platform

React.js, Node.js, Express.js, MongoDB

- Developed a web-based smart manufacturing platform for monitoring and managing manufacturing operations through a centralized interface.
- Implemented production monitoring, equipment status tracking, operational dashboards, and manufacturing workflow management.
- Designed responsive interfaces for visualizing manufacturing data and improving operational visibility.

Self-Diagnosing AI Pipeline Orchestrator

Python, React, JavaScript/TypeScript, PostgreSQL, REST APIs, YAML, CSV/Data Processing, AI/ML

- Developed an AI-powered data pipeline orchestration system to monitor pipeline execution, validate data, detect failures, and identify potential causes of pipeline issues.
- Implemented data-contract validation, data processing, pipeline execution, and automated failure-diagnosis workflows using Python, PostgreSQL, and REST APIs.
- Built a React-based interface for dataset upload, validation results, pipeline execution status, diagnostics, and real-time processing insights.
- Designed automated workflows for detecting data quality and pipeline execution issues and generating corrective recommendations based on actual processing results.

Manufacturing BOM Transformation Engine

Python, Data Processing, BOM Management

- Developed a data processing engine for transforming and managing Bill of Materials (BOM) data used in manufacturing workflows.
- Implemented data transformation and validation logic to organize component structures and manufacturing information.
- Designed processing workflows to improve consistency and simplify BOM transformation operations.

Stacker Crane Control System
Python, Control Systems, Automation

- Developed a control-system application for simulating automated stacker crane operations in warehouse environments.
- Implemented crane movement logic, storage and retrieval workflows, and equipment status monitoring.
- Designed control workflows to demonstrate automated material handling and coordination of warehouse equipment.

Warehouse Control System
Python, Automation, Warehouse Management

- Developed a warehouse control system for coordinating automated material-handling operations and warehouse workflows.
- Implemented task execution, inventory movement, equipment coordination, and warehouse monitoring functionality.
- Designed the system to model real-world warehouse automation and material-flow management.

CSV Data Cleaning Web Application
Node.js, Express.js, MongoDB, React.js

- Developed a full-stack web application to upload, preprocess, and clean CSV datasets dynamically.
- Built backend services using Node.js, Express.js, MongoDB, and authentication mechanisms.
- Implemented preprocessing techniques including missing value handling, duplicate removal, and normalization.
- Designed responsive frontend interfaces using React.js and Vite.

Food Recipe Web Application
Spring Boot, MySQL

- Developed a full-stack recipe management system using Spring Boot and MySQL.
- Designed REST APIs for user interaction and recipe management.
- Implemented CRUD operations and optimized relational database schema.
- Built responsive user interfaces for browsing and managing recipes.

Online Art Gallery Web Application
HTML, CSS, JavaScript, MongoDB

- Developed an online platform for showcasing and browsing digital artworks.
- Implemented responsive frontend pages using HTML, CSS, and JavaScript.
- Integrated database functionality for managing artwork information.
- Designed user-friendly interfaces for viewing art collections and artist details.

CERTIFICATIONS

- Scrum Fundamentals Certified (SFC)
- Microsoft AZ-900 Certified
- Microsoft Azure AI Associate
- ServiceNow Certified
- Advanced Automation Anywhere
- Japanese N5 Certification (NAT)

CODING PROFILES

- LeetCode

- CodeChef
- HackerRank

ACHIEVEMENTS & STRENGTHS

- Strong problem-solving and analytical skills.
- Proven ability to learn quickly and adapt to new situations.
- Skilled at working independently and collaboratively in a team environment.
- Excellent communication skills, both verbal and written.
- Familiar with Agile methodologies and collaborative development.
- Interested in scalable systems and software engineering.

RELEVANT COURSEWORK

DBMS, Operating Systems, Object Oriented Programming, Data Structures and Algorithms, Computer Networks

LANGUAGES KNOWN

Japanese, English, Telugu
